

## COST SUMMARY - Re-refined Motor Oil

Use this grid to calculate and compare costs based on current pricing. Prices are subject to change. Visit the [OSD Oil Update](#) document to review information and obtain current prices.

(See OSD Update #00-6 for current pricing on all products on Contract #VEH18)

### **REGION 1 (Western - Worcester, Franklin, Hampshire, Hampden, & Berkshire Counties)**

Re-refined Motor Oil	Cost 5W30		Cost 10W30		Cost 15W40	
Quantities	1-9 units	10+units	1-9 units	10+ units	1-9 units	10+ units
Case (12 quarts)						
5 Gallon Pail						
55 Gallon Drum						
Bulk (per gallon) minimum = 150 gallons						

Re-refined Motor Oil	Cost 10W40		Cost 20W		Cost 30W		Cost 40W	
Quantities	1-9 units	10+ units	1-9 units	10+ units	1-9 units	10+ units	1-9 units	10+ units
Case (quarts)								
55 Gallon Drum								
Bulk (per gallon) minimum=150 gal								

### **REGION 2 (Eastern - Middlesex, Essex, Suffolk, Norfolk, Bristol, Plymouth Counties & the Islands)**

Re-refined Motor Oil	Cost 5W30		Cost 10W30		Cost 15W40	
Quantities	1-9 units	10+units	1-9 units	10+ units	1-9 units	10+ units
Case (12 quarts)						
5 Gallon Pail						
55 Gallon Drum						
Bulk (per gallon) minimum = 150 gallons						

Re-refined Motor Oil	Cost 10W40		Cost 20W		Cost 30W		Cost 40W	
Quantities	1-9 units	10+ units	1-9 units	10+ units	1-9 units	10+ units	1-9 units	10+ units
Case (quarts)								
55 Gallon Drum								
Bulk (per gallon) minimum=150 gal								

### Big Three U.S. Auto Makers Positions on Use of Re-refined Motor Oil

#### General Motors Position

"General Motors recommends for use in its vehicles engine oils which meet the performance requirements specified in the latest International Lubricant Standardization and Approval Committee (ILSAC) Minimum Performance Standard, and **which are certified by the American Petroleum Institute (API) for use in gasoline engines....**"

"Engine oils meeting these requirements can be made with either virgin or re-refined base oils...."

#### Chrysler Corporation Position

"The engine oil used in Chrysler vehicles must meet the Owners Manual recommendation to satisfy warranty requirements. This recommendation is to use an oil displaying the API Certification symbol. It must also be the SAE viscosity grade appropriate to the temperature, as shown in the Owner's Manual."

"Oils that display this registered mark...are certified to meet all the requirements of the ILSAC....This specification does not differentiate between products made from virgin base oils or re-refined base oils...."

#### Ford Motor Company Position

"Regardless of the origin of the base oils, a non-Ford engine oil is acceptable for use if manufacturing and quality control practices ensure the oil continuously meets Ford's performance requirements."

"Ford recommends using engine oil meeting Ford Specification ESE-M2C 153-E and licensed as certified for gasoline engines by the API. **Both virgin and re-refined engine oils are capable of meeting these requirements** by qualifying against a series of rigorous tests designed to ensure their suitability..."
